Continuation of 11. does NOT place the application in condition for allowance because: Applicant argued that Wical does not teach parsing statements from at least one Semantic Web structured resource to identify component words". However, at Col. 5, lines 42-Col. 7, lines 30 Wical teaches a content processing system, which analyzes documents to provide thematic profiles and classification of the document. Likewise at Col. 27, lines 15-Col. 28, lines 58, Wical's teachings include the theme parser and grammatical parser of the document. Wical's content processing system identifies themes from terminology used in the documents, however, Col. 7, lines 8-33 of Wical's teachings includes the inference processing 145 which parses the document with a restaurant review column and adds the theme/term restaurant to the document theme vector 160. Wical's teachings of parsing the content of document 130 which could be accessed through a network to identify themes is synonymous to applicants teachings of parsing statements from at least one Semantic Web structured resource to identify component words.

Wical's teachings also includes structured resources at Col. 5, lines 28-41, wherein Wical's search and retrieval system includes documents labeled document 130, i.e. the document may be articles, books, periodical etc. The document is a compilation of information from any source, equivalent to applicant resources (collection of page in the specification) and the documents may be accessed via a network, (Col. 5, lines 28-41) Wical's teachings also includes constructing an index from said component words, said index relating said component words to said statements at Col. 6, lines 64-Col. 7, lines 2, Col. 29, lines 32-Col. 30, lines 6. Wical also teaches obtaining predicates, instances, types of said instances, and literal values of said related ones of said statements at Col. 4, lines 45-62 wherein Wical teaches a search using a query term Stock, the search and retrieval system response may include different types of documents such as financial securities (type) which is a stock and which is retrieved based on the search word stock (predicate), and animals (type) which is a stock and which is retrieved based on the search word stock (predicate), and race automobiles (type) which is a stock and which is retrieved based on the search word stock (predicate), which is synonymous to applicants teachings. Wical also teaches gathering statements from said identified Semantic Web structured resources to obtain gathered statements at Col. 2, lines 43-53, Col. 5, lines 28-41 and presenting said gathered statements for parsing of said gathered statements at Col. 5, lines 42-Col. 7, lines 33, Col. 27, lines 15-Col. 28, lines 58 .
